

Infrastructure

Infrastructure development has played and continues to play a very crucial role in this growing era of Indian economy. We realise that it is the need of an hour to provide appropriate support and advice to the Private, Public Sector Undertakings or Government authorities involved in this sector. We have been trusted advisor to various private, public sector enterprises and government clients in various sectors including Roads and Highways, Healthcare, Hospitality, Aviation, Ports, Railways, Metros, Education, Policy reforms, Real Estate, Smart Cities, and Transport. ANM's Delhi office is leading the firm's Infrastructure Practice and it has been involved in some of the projects of great national prominence.

In recent years, the Country has seen trend of development of infrastructure project on Engineering Procurement and Construction (EPC) model and PPP (Public Private Partnership) model which allows participation of a private party in the form of Build, Own and Operate (BOO) basis, Build, Operate and Transfer (BOT) basis, or Build, Lease and transfer (BLT) basis.

We assist our clients in drafting of bid documents, development of different standard contracts, bid evaluations, negotiation and drafting of concession agreements, Operation and Maintenance (O&M) Contract, EPC contract, Land Lease Agreements and other agreements that are prevalent in the infrastructure sector. We also assist our clients during the execution of projects through and contract management. Our team is adept at advising clients on regulatory and policy reforms. Through our Litigation and Dispute Resolution Team we effectively advise and represent our clients on any dispute arising out of such contracts during and after execution of project.

Apart from our office in Delhi we have our branch offices at Gurgaon, Mumbai, Kanpur, and Bengaluru which ensures our presence for our clients in every corner of the Country.
